# SKELETON TO STRETCH!

*FC Filter* is a collection of skeleton based fonts dropped in a magical melting pot of sliders.

Scripts:

LATIN

Tags:

DISPLAY

SANSSERIF

VARIABLE

SUPER FAMILY

Moving from fine *to*  
mega-black over a  
back slant *to* ultra  
wide where curves  
are dancing and while  
maintaining the line  
*thickness at all cost.*

Filter has multiple transformations in a variable font:

# 1. Weight

Going from *thin* over **black** to **mega-black**.

# 2. Slant

Going from a backslant to a *slant* in the reading direction.

# 3. Width

Going from *extremely compressed* to *extremely extended*

## 4. Stroke Endings

Stroke endings are going from flat, square to rounded. The rounding starts at the corner of each stroke ending.

## 5. Stroke Shift

Each stroke is shifted from left to right to achieve a graphical coolness effect.

### FC FILTER: Restrained weirdness with better “monospaced” ragging

All glyphs of Filter have a monospaced width  
or that are 50% (l + i), 150% (M + w), ...

*FC Filter* by *Font Club Belgica* is a modern revival of a brilliant yet overlooked idea from type history, blending technical precision with contemporary design. Inspired by *W.A. Dwiggins'* concept of variable-width characters to improve fixed-width typewriters, *Filter* features 50% and 150% glyphs for refined spacing. Historically, engineering and technical industries relied on rigid, monospaced typefaces like *Courier* and

*OCR-A*, designed for clarity and machine readability, but these came with visual constraints. *Filter* transcends these limitations by incorporating angled, stubbed terminals and half-width spaces, adding a distinctive mechanical flair while enhancing legibility and efficiency. Ideal for applications in engineering, aerospace, gaming, and outdoor branding, *Filter* offers a nod to tradition while delivering a fresh, versatile tool for modern design.

Ama Dablam is one of the most striking and iconic peaks in the Himalayas, standing at 6,812 meters in eastern Nepal.

FC Filter 110 X Condensed Light | 22/28pt

Its name, which means “Mother’s Necklace” in Nepali, reflects its unique shape. The mountain resembles a mother

FC Filter 120 X Condensed Regular | 22/28pt

embracing her child, while the long ridges extending from its summit resemble protective arms. The hanging glaciers

FC Filter 130 X Condensed Medium | 22/28pt

that drape below the peak are thought to represent a traditional “dablam,” a sacred pendant worn by Sherpa

FC Filter 140 X Condensed Bold | 22/28pt

women. This poetic and symbolic name has made Ama Dablam not only a geographical marvel but also a cultural treasure

FC Filter 150 X Condensed Extra Bold | 22/28pt

in the Khumbu region, where it is highly revered by the Sherpa people. The first successful ascent of Ama Dablam

FC Filter 160 X Condensed Black | 22/28pt

Despite its difficulty, Ama Dablam has become a coveted objective for mountaineers seeking a demanding but rewarding climb. The mountain

FC Filter 110 X Condensed Light | 14/18pt

is often described as the “Matterhorn of the Himalayas” due to its striking pyramidal shape. Many expeditions take place in the post-rain

FC Filter 120 X Condensed Regular | 14/18pt

season, from October to November, when the weather is most stable. The ascent typically takes two to three weeks, with climbers

FC Filter 130 X Condensed Medium | 14/18pt

acclimatizing in base camp before establishing higher camps along the ridge. Over the years, the mountain has witnessed numerous ascents

FC Filter 140 X Condensed Bold | 14/18pt

as well as tragic accidents, reinforcing its reputation as both a breathtaking and formidable challenge. Beyond mountaineering, Ama Dablam

FC Filter 150 X Condensed Extra Bold | 14/18pt

holds a special place in the hearts of trekkers and adventurers who visit the Everest region. Its dramatic silhouette dominates the landscape

FC Filter 160 X Condensed Black | 14/18pt

making it one of the most photographed peaks in Nepal. It stands as a symbol of both beauty and challenge, drawing climbers, trekkers

FC Filter 111 X Condensed Light | 14/18pt

and photographers alike. Whether seen from a distance along the Everest Base Camp trail or climbed by those seeking a true alpine

FC Filter 121 X Condensed Regular | 14/18pt

challenge, Ama Dablam continues to inspire awe and admiration, remaining one of the most revered mountains in the world. Ama

FC Filter 131 X Condensed Medium | 14/18pt

Dablam is part of the Mahalangur Himal, a subrange of the greater Himalayas that stretches across eastern Nepal and Tibet. This range is home

FC Filter 141 X Condensed Bold | 14/18pt

to some of the world's highest and most peaks, including Mount Everest (8,849 meters), Lhotse (8,516 meters), and Makalu (8,485

FC Filter 151 X Condensed Extra Bold | 14/18pt
